PROFILE

Software engineer with a foundation built since 2018 — before AI tools existed — combining deep system-level understanding with modern full-stack, mobile, and embedded development. I design systems from first principles, make technology decisions based on real requirements, and use AI as a productivity multiplier rather than a substitute for thinking. I have shipped real-time WebSocket libraries, Arduino + ESP-based attendance hardware, GPS tracking platforms, and cross-platform mobile apps. I bring both product thinking and technical execution to every project.

SKILLS

Languages Python · JavaScript / TypeScript · C/C++ · SQL
Backend FastAPI · Django · Next.js · Node.js · GoLang
Frontend TailwindCSS · React.js · React Native · HTML / CSS
Embedded / IOT Arduino · ESP 8266 / ESP32 · Firmware · ZKTeco
Databases MySQL · PostgreSQL · MongoDB · SQLite · MS Access
Real-Time WebSockets · mr-wshandler (custom library)
DevOps / Tools Linux · Apache · Nginx · Uvicorn · Git / GitHub · Network
AI / Integration Minimax · OpenAI · Maps · Stripe · Twilio · Shopify

WORK EXPERIENCE

● **Lab Assitant (Intern)** 2023 – 2024
Riphah International College
● **Network & Desktop Support** 2024 – 2026
IP-Tel Services
● **Full Stack Developer (Freelance)** 2024
(Contract Based)
● **Shopify Developer (Intern)** 2026
Maftech
