Education

FAST NUCES

Bachelor of Computer Science

Aug 2022 - May 2026

Technical Strengths

Languages	C++, Rust, Python, Bash, Assembly
Cyber Security	Penetration Testing, Web Security (OWASP Top 10), API Security, Binary Exploitation, CPTS
Security Tools	Burp Suite, Nmap, Wireshark, Metasploit, SQLMap, Gobuster, Nikto
Defensive Security	IDS/IPS Basics, Log Analysis, Threat Detection, Secure Coding Practices
Others	Docker, AWS, Backend Development, SQL
Core Competencies	Debugging, Vulnerability Analysis, Problem Solving

Projects

Multi-Modal Product Retrieval System (Industry Collaboration)

[Link](#)

Built in collaboration with industry, developed a **multimodal OpenCLIP** retrieval pipeline on 40k+ records, deployed using **HNSW indexing** and backend APIs with focus on scalable and secure deployment.

Cyber Security Homelab & CTF Infrastructure

Designed and deployed multiple **Docker-based homelabs** to simulate real-world attack/defense scenarios for **CTF challenges**. Implemented vulnerabilities including **XSS, SQLi, SSRF**, and integrated basic **IDS-style monitoring** for detection and analysis.

API Security Analyzer

Developed a **CLI-based API fuzzing** tool detecting **OWASP Top 10 vulnerabilities** including **SQLi, XSS, and rate-limiting issues** by parsing OpenAPI specifications and logging structured findings.

Unpaired Image-to-Image Translation

[Link](#)

Implemented a CycleGAN-based system for unpaired image translation, focusing on robustness and controlled data pipelines.

Balloon Blow game in Assembly language

[Link](#)

Built a compact **16-bit x86** game using **BIOS/VGA interrupts** and low-level memory management.

Certifications

Certified Security Code Review Beginners ([CSCRB](#))

Extra-Curricular

- **President, FAST Society of Cyber Security**: Led security workshops, hackathons, and technical sessions.
- Organized **Capture The Flag (CTF) Competition** (April 2025), including challenge design and infrastructure deployment.
- Served as a **Teaching Assistant** for Computer Organization and Assembly Language.
- Solved 100+ problems on **LeetCode**.
